Getting Started

The contents of this product are designed to be viewed directly from the media (CD or DVD) using a web browser. To access content, open the main HTML file (“Start.htm”) in your web browser.

Software Requirements

Windows®: Windows 7 or newer

Macintosh®: Mac OS X 10.8.4 or newer

All Systems: Omnipress supports only the two most recent major releases of Google Chrome, Firefox, Internet Explorer, and Safari (Mac only) at any given time.

When a new version of any of the browsers listed is released, we will begin our support of that version and discontinue our support of the third most recent version. (For example, we would support Chrome 32.3 when it is released, and we would continue to support Chrome 32.2. Our support of Chrome 32.1, however, would stop as soon as Chrome 32.3 launched.)

Omnipress cannot guarantee our digital products will retain all functionality with future changes made to browser and operating system security configurations by their developers. Extensive help documentation is included with all of our digital products.

You may need Adobe Acrobat Reader 9 or later for viewing PDF content, the free Adobe Flash Player for multimedia content, and additional software may be needed to view some materials included on this product.

Need Help?

Refer to the “Software Requirements.htm” file located on this disc for general product support, downloading and installing Adobe Reader, and copying this product to your hard disk or network. A complete help file is accessible from the main menu of this product (internet connection optional). Omnipress technical phone support is available at 608-246-2600 (Mon-Fri 8am-5pm CST) or by e-mail at digital@omnipress.com. Limited support for UNIX and Linux systems. This product is not supported if hosted on a web server.

This product was produced by Omnipress – leaders in conference & educational publications.
